LOLLAND LEADER AREA

Lolland is characterised by its many kilometres of coastline and its numerous islands, lakes, and inlets. No matter where you are in Lolland, you are never far from the sea, forests or lovely landscape.

LOLLAND LEADER AREA

Characteristics

Intensive crops: 80%, towns, meadow, woodland: 20%

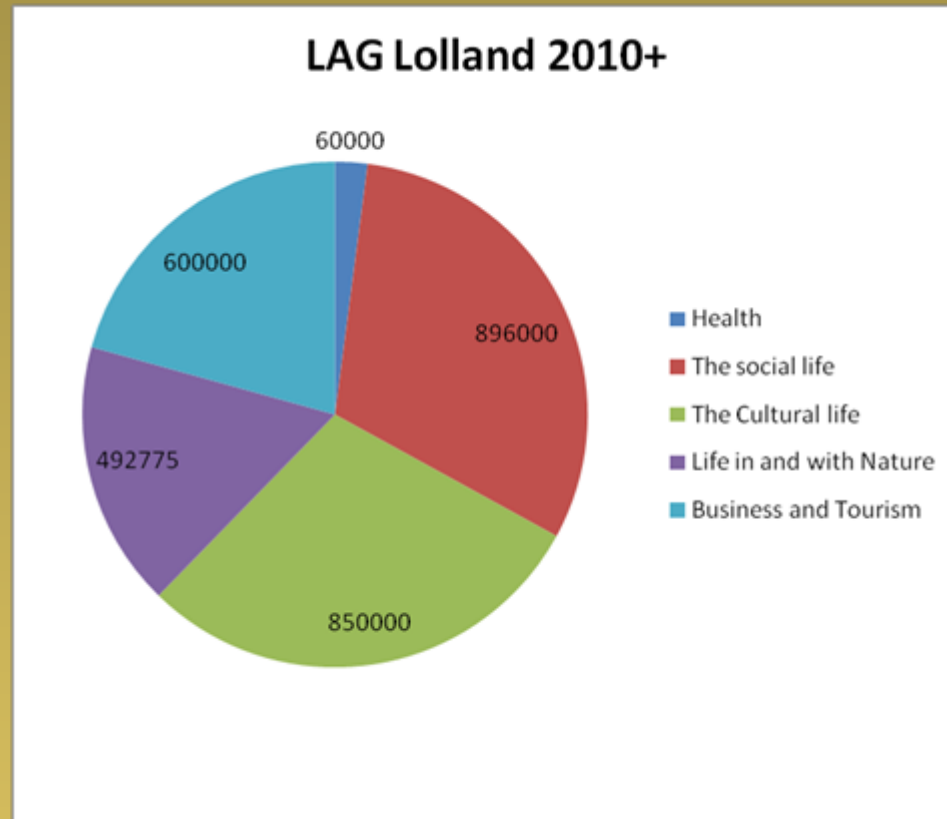

Farms growing in size

Fields growing in size

Monoculture

LAG LOLLAND'S FOCUS AREAS

BEES AND BIODIVERSITY EUSBSR 28 SEPTEMBER 2011

Contradiction:

LAG Lolland in want of green projects in order to fulfil our strategic aims.

There is a general awareness among the population of the necessity to preserve biodiversity and to counter the harmful effects of monoculture

BEES AND BIODIVERSITY EUSBSR 28 SEPTEMBER 2011

Invitation, spring 2011, from LAG Pays Voironnais

1. *Limit pollinators poisoning by chemicals (insecticides, fungicides, fertilizers ...)*
2. *Ensure sufficient quality food supply for pollinating insects (especially before the winter season)*
3. *Support beekeeping activity*

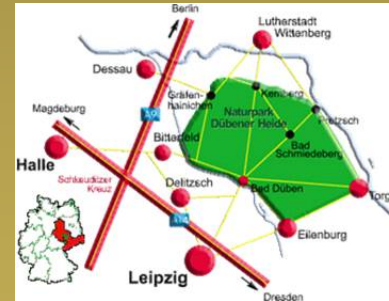

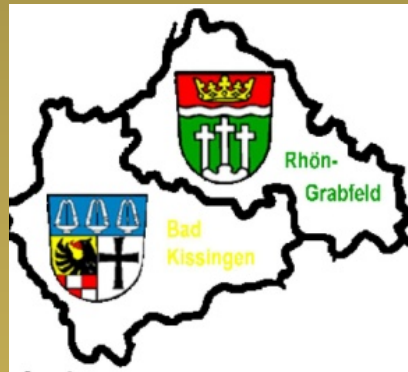

BEES AND BIODIVERSITY EUSBSR 28 SEPTEMBER 2011

Our expectations are to develop a common european project for the preservation of bees and biodiversity. A consensus about the needs to preserve nature on a european scale is necessary for the project to succeed also on a local scale.
